Agricultural (Ag) Lime is a -1000um sized calcium carbonate product that is manufactured at our Gore site in Queensland using a crushing, milling and screening process producing a white to off-white product that is very consistent in size and quality. Agricultural Lime is used as an additive to adjust the pH of soils as well as an ingredient in animal feeds and supplements and other industrial manufacturing applications. Our Agricultural Lime is available from a silo as a clean dry product or from a bulk stockpile and is available in a variety of packaging options.
